

**Microbiology 2730
Study Guide #11
Winter Semester 2008
E. Hoffman**

LABORATORY SECTION

ANTIBIOTIC SENSITIVITY TESTING—Continued

1. You should be able to cite 4 different approaches to the development of antibiotic resistance on the part of bacterial cells.
2. You should be able to cite 4 major areas in the bacterial cell which are commonly attacked by antibiotics.

LECTURE SECTION

Students, considering the question set that appears on study guide #10, there are no new questions at this time for this section.
